

North Jersey Spine Group: A TEAM APPROACH TO SPINE CARE

North Jersey Spine Group is a new spine Center of Excellence specializing in back and neck pain. The center is a byproduct of discussions with case managers, rehab nurses and managed care experts on a local and national level who believe that spine care can be improved through a multi-disciplinary, Center of Excellence approach. This spine Center of Excellence includes 10,000 sf dedicated to spine, with a full exercise gym, spine-specialized physical therapy, a complete diagnostic center with digital X-ray and an injection suite. In the past, the back or neck pain sufferer often had to drive around North Jersey to multiple centers for all this complementary expertise, diagnostic capabilities and spine specialized therapy. Now we are able to provide it all under one roof for the convenience of the patient. By putting all the necessary ingredients for spine care under one roof, North Jersey Spine Group represents one of the most comprehensive spine centers in New Jersey.

As part of this effort to improve spine care, we are committed to a well-informed patient. We have a virtual encyclopedia on spine at www.NorthJerseySpineGroup.com that has symptom charts, medical illustrations and exercises that relieve back and neck pain. You are welcome to refer patients to that site for information. As a community service, we also provide a free 36-page Home Remedy Book that has been a godsend to more than a hundred thousand patients across the U.S.

SPINE SURGEONS

David Sundstrom, M.D.

*Board-certified Neurological Surgeon
Specializing in spine surgery*

Dr. David Sundstrom is a board-certified neurological surgeon who specializes in the treatment of back and neck pain, including the use of spine surgery. He treats a variety of back and neck problems, ranging from simple disc problems to complex spine surgeries requiring the most advanced instrumentation.

Rajnik W. Raab, M.D.

*Board-certified Neurological Surgeon
Specializing in spine surgery*

Dr. Raab is a board-certified neurological surgeon who specializes in the treatment of back and neck pain, including the use of spine surgery. He is proficient in spine surgery, including the use of the latest minimally invasive spine surgery instrumentation that decreases the size of incisions, shortens hospital stay, and speeds return to activity.

NONSURGICAL SPINE PHYSICIANS

Monte Haber, M.D.

*Board-certified Physical Medicine & Rehabilitation
Fellowship-trained in Pain Medicine*

Dr. Haber is a board-certified physiatrist who specializes in interventional pain medicine. He focuses on the assessment, diagnosis and non-surgical treatment of back and neck pain problems. Dr. Haber is proficient in pain-relieving cervical and lumbar spinal injections. He is skilled in EMG/nerve conduction studies and Musculoskeletal Rehabilitation.

PHYSICAL THERAPISTS

Kimberly Kuiken, MSPT, MTC, BSBS, CCI Spine specialized physical therapist Director of Therapy

Kimberly Kuiken is a spine specialized physical therapist with advanced training in spine through the Paris Institute, a world-recognized manual therapy educational institution based in Florida. In addition to her expertise with hands-on manual therapy techniques to relieve back and neck pain symptoms, Kimberly also has training in McKenzie therapy techniques, Mulligan therapy principles, spine stabilization and the use of exercise therapy for spine.

Cathy Kuschan, PT

Spine specialized physical therapist

She graduated from Russell Sage College in Troy, NY with a Bachelors of Science in Physical Therapy. At North Jersey Spine Group, Cathy specializes in developing effective home exercise programs that help back and neck patients recover quickly and return to active lifestyles. Cathy is well versed in a broad range of physical therapy programs, treatments and modalities. Cathy is committed to delivering quality spine-specialized physical therapy care to patients.
